

Welcome to the Power BI Embedded Playground

While you are here, you can try many of our features without writing any code.
Explore our APIs and see the results instantly so you know the options for your application.

To get started, select the sample you want to explore, make any changes to get the results you want, and then click "Run".

You can check out our interactive feature showcase to experience embedded features for your application.

We add the latest features into the Playground, so you can explore them before adding them to your implementation.

Sample Report

Embed a sample report and interact with Power BI Embedded firsthand.

Try it

Sample Report Visual

Embed a sample report visual and interact with Power BI Embedded firsthand.
